

Envision partners with Kimbrough for Kids

(CINCINNATI; November 2008) - Envision Learning Center has formed a partnership with Kimbrough for Kids, an organization that teaches reading, writing and basketball, to broaden student's experience by adding athletics to Envision's programming. The partnership brings organized sports to the students of our Academic Summer Enrichment Camp beginning in 2009. Twice per week, children will be taught how to play a variety of sports. Rules of Engagement will be taught and games played. This interaction is meant to broaden horizons, encourage physical fitness and promote teamwork.

Stan Kimbrough put the physical education program together using the drills and knowledge he learned while playing basketball for Xavier University (Cincinnati) and in the NBA with the Detroit Pistons.
